

# A Generative Flow

Through the expansion of our consciousness  
We will develop a deeper reverence for Nature  
As Earth continues to flow with abundance  
Throughout its blossoming cycles of life

In harmony with the synergy of oneness  
We can work together in unity  
To bring out the best in one another  
By bringing out the best in ourselves

Within a selfless intention of service  
We will humbly give from the overflow  
In pulsing surges of compassion  
Knowing that there is nothing to fear

The soulful language of truth  
Is reconfiguring our minds  
Upon a new pathway of change  
Born through the awareness of our Hearts

From a place of surrender  
We shall remember life's purpose  
To raise our vibration as individuals  
Whilst contributing to the evolution of all

And as mankind gradually awakens  
From the illusion of separateness  
A generative flow of equality  
Will spread like a contagion throughout the land

All Beings are entities of Light  
Imbued with a blueprint of exploration  
Upon a progressive journey of discovery  
Propelled by an eternal generation of Love.
